

RBC BEARINGS CAREERS

RBC Bearings is a well known international manufacturer and marketer of highly engineered precision plain, roller and ball bearings. We have been providing bearing solutions to our customers since 1919. Over the past ten years, under the leadership of our current management team, RBC Bearings has significantly broadened our end markets, products, customer base and geographic reach. We currently have 25 facilities, of which 22 are manufacturing facilities in four countries.

JOB TITLE/LOCATION:

Manufacturing Engineering Technician. 1st shift - Aircraft Products Inc., Torrington, CT

DESCRIPTION:

Under the direction of the Manufacturing Engineering Manager, assist manufacturing engineers to provide technical support to manufacturing and process development of bearings. The purpose of this position is to assure that products can be manufactured with the highest quality standards at the lowest possible cost.

ESSENTIAL FUNCTIONS OF THE JOB:

1. Able to work with minor supervision and relies on limited experience and judgment to plan and accomplish projects.
2. Solve technical problems supporting production.
3. Manage technical projects to completion. This may include machine rebuilds, corrective actions, new product launches, machine repairs, implementation of 6S and lean activities, etc. that support yearly goals as outlined by senior management.
4. Assist manufacturing engineers with manufacturing operations from both a design of operation and troubleshooting view including those associated with development of new products.
5. Prepare work instructions and provide training for operators and staff to assure the consistency of operations.

EDUCATION

A.S.M.E. with 6 months experience or manufacturing related experience is desired which would provide the level of knowledge, skill and ability required. As an entry level position, a recent graduate with a BSME would be considered.

EXPERIENCE:

Prior experience in a manufacturing setting , through internship or working experience

SKILLS / CERTIFICATIONS:

1. Must have basic to intermediate computer skills including Office, Word, Excel & email.

2. Good written and verbal communication skills.
3. Problem solving.
4. Communicate effectively.
5. Work well on teams.
6. Understand lean manufacturing.
7. Bearing technology.
8. Grinding theory.
9. Must have understanding of basic machining practices such as turning, milling and heat treat, and plating.
10. Must be able to analyze data and make decisions relative to manufacturing process.
